

General Information

The creation of the **bilingual polythematic Thesaurus of Scientific Terms**, in the framework of **the Horizontal Action for Hellenic Academic Libraries**

that was

funded by the 3rd

C(ommunity) S(upport) F(ramework), has the following ambitious aims :

- to support the subject indexing of hellenic academic libraries' collections,
- to facilitate the information seeking process, the localization of information and the information retrieval within the Union Catalog as well as within the catalogs of the libraries-members of the Consortium,
- to support a better level of subject organization of the information in libraries,
- to contribute to the development of digital libraries and thematic portals in Greece,
- finally, to make known the hellenic intellectual production abroad, through the use of hellenic scientific work by foreign users.
